About

Motivated Full Stack Developer and Software Engineering student at FAST NUCES with strong expertise in C++, Java, Python, Data Structures, and modern web technologies. Proficient in HTML, CSS, JavaScript, React, Node.js, SQL Server, and Java Swing, with hands-on experience in building scalable, high-performance web and desktop applications. Passionate about solving complex problems, writing clean and efficient code, and delivering user-centric solutions that create real-world impact.

Work Experience

Website Developer Intern **Studio93** 1st July 2025
Technologies: HTML, CSS, JavaScript, React.js, JSON Server, Vercel, Netlify, Railway

- Developed and maintained responsive web applications using **React.js** and **JavaScript**.
- Deployed **frontend** applications on **Vercel** and **Netlify**, and **backend services** on **Railway**.
- Collaborated on multiple web projects, focusing on **performance**, **scalability**, and **cross-device compatibility**.

Frontend Developer Intern **CodeAlpha** July 2024 – August 2024
Technologies: HTML, CSS, JavaScript.

- Designed and built responsive web pages utilizing **HTML**, **CSS**, and **JavaScript**.
- Worked closely with team members to improve website performance and overall user experience.
- Participated in project brainstorming sessions and supported **agile development workflows**.

Education

Bachelor of Software Engineering (BSSE), Fast NUCES Lahore, Pakistan **2023 – 2027 (Expected)**

Pre-Engineering, Government College University Lahore, Pakistan **2021 - 2023**

Skills

- **Languages:** C++, Java, Python, JavaScript, SQL
- **Technologies:** HTML, CSS, Bootstrap, React.js, Node.js, Express.js, SQL Server, MySQL, Git, GitHub, REST APIs, JSON Server, WinForms
- **Other:** Data Structures and Algorithms, Object-Oriented Programming (OOP), Problem Solving, Debugging, Database Design, Leadership, Team Management, Communication, Time Management

Projects

Priorify – AI-Based Sentiment Analysis System

- Building an AI-powered sentiment analysis system using Python to classify and analyze textual data using natural language processing (NLP) techniques.
- Focused on designing a scalable system for extracting insights and improving decision-making through data-driven analysis.

RAAH – Mobile Application (React Native + Python Flask)

- Developed a cross-platform mobile application using React Native with a Flask backend to deliver dynamic and scalable user functionality.
- Integrated RESTful APIs for seamless communication between frontend and backend, focusing on performance, user experience, and real-time data handling.

EduNovix – Full Stack E-Learning Platform

- Developed a full-stack e-learning platform using React, Node.js, Express, and SQL Server to manage courses, students, instructors, and exams.
- Implemented secure authentication, RESTful APIs, and efficient database integration using stored procedures, enabling dynamic content delivery and a responsive user experience.

SmartScheduler – Desktop Application (C++ / WinForms)

- Designed and developed a desktop scheduling application using C++ and WinForms to optimize task and resource management.
- Implemented core scheduling logic with a focus on efficiency, structured design, and user-friendly interaction.
